SUMMARY

Statistics graduate from Universitas Indonesia with experience in data analytics, business intelligence, and financial reporting. Skilled in Python, SQL, Power BI, Power Query, and Excel to automate data workflows, build interactive dashboards, and perform statistical analysis that supports business decision-making. Strong ability to transform complex data into actionable insights through analytical problem-solving and effective cross-functional collaboration.

EDUCATION

Universitas Indonesia – Depok, Indonesia

Aug 2021 - Jan 2026

Bachelor of Statistics

GPA: 3.34/4.00

- **Thesis:** Topic-Level Sentiment Analysis to User Reviews of the PLN Mobile Application on Google Play Store.
- **Relevant coursework:** Introduction to Data Science, Data Exploration and Visualization, Algorithm and Programming, Statistical Computing, Database for Data Science, Data Mining & Business Intelligence, Sampling and Survey Design, Linear Modelling, Econometrics, Categorical Data Analysis, Multivariate Analysis, Digital Data Collection Methods, and Forecasting Method.

SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras), R, SQL (MySQL, SQLite).
- **Business Intelligence:** Microsoft Excel (Advanced Formulas, Pivot Tables, Power Query), Microsoft Power BI, Dashboard Development.
- **Data Engineering:** ETL (Extract, Transform, Load), CRUD (Create, Read, Update, Delete), Data Cleaning, Data Transformation, Data Validation.
- **Data Analysis:** Exploratory Data Analysis (EDA), Statistical Modeling, Regression Analysis, Hypothesis Testing, Time Series Analysis, Machine Learning (Regression, Classification, Clustering), Deep Learning (Neural Networks, BERT).
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Project Management, Attention to Detail, Adaptability.

WORK EXPERIENCE

PT Bank Danamon Indonesia Tbk

DKI Jakarta

IT Financial Control Analyst Intern

May 2026 – Now

- Monitored and tracked IT Investment Proposals (I2P) through Confluence by providing daily status updates for approved and ongoing projects, supporting weekly and monthly management reporting.
- Automated financial data workflows using Power Query to extract, cleanse, standardize, and consolidate recurring datasets, including EGL master data, I2P budgets, PR/PO spending, OPEX, CAPEX, and finance reporting data, improving reporting accuracy and efficiency.
- Developed and maintained Power BI dashboards to visualize project status, budget utilization, and financial performance, enabling timely decision-making and streamlined reporting.
- Performed automated reconciliation, variance analysis, and exception reporting to compare current and prior period financial data, identify material changes, and improve visibility across Budget, PAM, I2P, PR, and PO transactions.
- Prepared financial reports for IT cost monitoring, budget tracking, cost allocation, asset reporting, and ad hoc analysis, including actual spending, budget utilization, remaining budget, and variance analysis.
- Conducted monthly IT shared cost allocation for Grab vouchers and petty cash across IT teams, while maintaining data automation processes and developing advanced Excel reports to ensure reporting accuracy and consistency.

Kementerian Perindustrian Republik Indonesia

DKI Jakarta

Industrial Data Analyst Intern

Sep – Dec 2024

- Analyzed and cleansed large-scale industry and export-import datasets using Excel (Pivot Tables) and Google Sheets to deliver accurate, decision-ready reports.
- Conducted exploratory data analysis to uncover key trends in production, capacity, and trade flows within the chemical sector, supporting strategic evaluation.
- Developed impactful data visualizations and executive-ready presentations to translate complex insights for non-technical stakeholders.
- Prepared formal reports, meeting minutes, and memorandums in compliance with government standards, while collaborating cross-functionally to support policy monitoring and data-driven discussions.

PROJECTS

Topic-Level Sentiment Analysis to Reviews of the PLN Mobile on Google Play Store | Python (BERT, NLP, TensorFlow) 2025

[GitHub](#) | [Report](#)

- Executed advanced topic-level sentiment analysis on user reviews using BERT-NN, achieving 96% classification accuracy, and BERT-EFCM for topic extraction, uncovering 8 feature-level topics to deliver actionable insights on user satisfaction.

Multi-Platform API Data Scraping | Python (API, Pandas, JSON Processing)

2024

[GitHub](#) | [Report](#)

- Built an end-to-end Python-based API data scraping pipeline, extracting data from multiple platforms, transforming complex JSON responses into structured datasets with Pandas, and performing rigorous data cleaning and preprocessing to ensure high-quality, analysis-ready data.

EDA & Data Mining on Health Data Python (Logistic Regression, EDA)	2023
GitHub Report	
Identified key health insights using Logistic Regression, revealing the most prevalent diseases, correlations among chronic conditions, and the effects of marital status and obesity on mental health outcomes.	
Online Bookstore Database System SQL, SQLite, ER Modeling	2023
GitHub Report	
Designed and implemented a SQL-based online bookstore database supporting full CRUD operations and customer purchase analysis to enable personalized recommendations and data-driven business insights.	
Exploratory Data Analysis about Building Energy Usage Python (Pandas, NumPy, Matplotlib, Seaborn), EDA	2022
GitHub Report	
Identified and synthesized key insights from ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) research to support and inform approaches for predicting building energy consumption.	

And many more...

ORGANIZATION & VOLUNTEERING EXPERIENCE

Pojok Statistik	
<i>Agent of Statistics for Services and Consultations</i>	Feb – Sep 2024
Delivered statistical consultations and translated BPS data into high-impact infographics and videographics to support data-driven decision-making across digital platforms.	
LOGIKA UI 2024	
<i>Vice Head of Secretarial Division</i>	Jun 2023 – Feb 2024
Co-led a five-member team and automated large-scale administrative documentation for 150+ schools and 100+ universities, significantly improving operational efficiency and accuracy.	
Pengenalan Departemen Matematika 2023	
<i>Staff of Secretarial Division</i>	Aug – Oct 2023
Drafted and distributed formal invitation letters to lecturers while managing weekly student registration support and attendance reporting to ensure accurate and professional onboarding documentation.	
TOSSAKA 19th	
<i>Head of Secretarial Division</i>	May 2022 – Jan 2023
Led end-to-end secretarial operations, streamlining administrative documentation across divisions and directing the issuance of 100+ external letters and certificates to ensure timely, professional communication and formal recognition.	
Olimpiade Ilmiah Mahasiswa UI 2022	
<i>Staff of Fundraising</i>	Sep – Dec 2022
Compiled, verified, and monitored income data across multiple divisions using spreadsheets, ensuring accurate financial reporting and compliance tracking.	
Pengenalan Departemen Matematika 2022	
<i>Staff of Creative Division</i>	Jul – Oct 2022
Mentored 11 new students through structured academic and social guidance, while analyzing performance data using spreadsheets to monitor progress and support program evaluation.	
Himpunan Mahasiswa Departemen Matematika FMIPA UI	
<i>Administration and Secretarial Bureau Intern</i>	Nov 2021 – Feb 2022
Automated internship certificate issuance using Autocrat with 100% accuracy, while implementing a structured filing system and drafting formal invitations to strengthen administrative efficiency and professionalism.
