SUMMARY

Statistics graduate from Universitas Indonesia with experience in data analytics, business intelligence, and financial reporting. Skilled in Python, SQL, Power BI, Power Query, and Excel to automate data workflows, build interactive dashboards, and perform statistical analysis that supports business decision-making. Strong ability to transform complex data into actionable insights through analytical problem-solving and effective cross-functional collaboration.

EDUCATION

Universitas Indonesia – Depok, Indonesia

Aug 2021 - Jan 2026

Bachelor of Statistics

GPA: 3.34/4.00

- **Thesis:** Topic-Level Sentiment Analysis to User Reviews of the PLN Mobile Application on Google Play Store.
- **Relevant coursework:** Introduction to Data Science, Data Exploration and Visualization, Algorithm and Programming, Statistical Computing, Database for Data Science, Data Mining & Business Intelligence, Sampling and Survey Design, Linear Modelling, Econometrics, Categorical Data Analysis, Multivariate Analysis, Digital Data Collection Methods, and Forecasting Method.

SKILLS

- **Programming:** Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras), R, SQL (MySQL, SQLite).
- **Business Intelligence:** Microsoft Excel (Advanced Formulas, Pivot Tables, Power Query), Microsoft Power BI, Dashboard Development.
- **Data Engineering:** ETL (Extract, Transform, Load), CRUD (Create, Read, Update, Delete), Data Cleaning, Data Transformation, Data Validation.
- **Data Analysis:** Exploratory Data Analysis (EDA), Statistical Modeling, Regression Analysis, Hypothesis Testing, Time Series Analysis, Machine Learning (Regression, Classification, Clustering), Deep Learning (Neural Networks, BERT).
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Team Collaboration, Project Management, Attention to Detail, Adaptability.

WORK EXPERIENCE

PT Bank Danamon Indonesia Tbk

DKI Jakarta

IT Financial Control Analyst Intern

May 2026 – Now

- Automated integration of refreshed 2026 EGL data into an existing eight-year historical master using Power Query, enabling repeatable monthly updates and consolidated reporting across nine years while preserving prior-year records and preventing duplicate current-year entries.
- Prepared and standardized Budget, PAM, I2P, PR/PO, OPEX, and CAPEX data across 25+ reporting fields using Power Query, applying data cleansing, status normalization, error handling, and financial-value validation to support recurring dashboard refreshes and management reporting.
- Developed four reusable Power Query workflows for HW/SW, AMC, OPEX, and IT Cost data, integrating 2026 data with 2022–2025 historical records to support Plan, Actual, MYF, and Outlook reporting with monthly and future-year refreshes.
- Maintained Power BI financial dashboards covering 100+ IT projects up to director-level reporting, updating data parameters and reporting periods to ensure current visibility into project status, budget utilization, procurement progress, and financial performance.
- Performed reconciliation, variance analysis, and exception reporting using Power Query, comparing current and prior period data across 10+ Budget, PAM, I2P, PR/PO, OPEX, and CAPEX measures, identifying 150+ period-over-period movements to improve visibility and reduce manual review effort.
- Conducted monthly IT shared-cost reporting for Grab vouchers and petty cash from May to July 2026, reviewing hundreds of usage records across multiple IT divisions and cost centers while maintaining Power Query workflows and advanced Excel reports to ensure allocation consistency and reporting accuracy.
- Monitored and maintained 95+ IT Investment Proposals through Confluence, providing daily status updates and expanding tracker coverage by 20%+, adding/updating 20+ proposal records since May 2026 to support timely weekly and monthly management reporting.

Kementerian Perindustrian Republik Indonesia

DKI Jakarta

Industrial Data Analyst Intern

Sep – Dec 2024

- Cleansed and analyzed industrial portal data for 930 chemical manufacturing accounts across 19 national associations and 36 industry classifications (KBLI) to evaluate state-level production capacity, informing domestic supply chain policies.
- Analyzed 2024 export-import trends across large-scale datasets, identifying strategic trade shifts, including shifting import dependencies, to support government trade policy formulation.
- Audited national production databases, identifying critical reporting anomalies such as unit mismatches and dormant accounts, and formulating standardized data governance protocols that improved long-term data accuracy.
- Designed executive presentations mapping chemical factory locations across 34 provinces to help ministry leadership visualize national industrial distribution.
- Evaluated data reporting consistency for a national association, uncovering a low 41% compliance rate and presenting findings to identify missing records and guide targeted follow-up.

- Prepared 8 official reports and meeting minutes in compliance with government standards, collaborating cross-functionally to support policy monitoring and data-driven discussions.

PROJECTS

End-to-End Air Quality Index (ISPU) Analytics Python (Pandas, NumPy), Power BI GitHub Report	2026
Engineered an automated Python data pipeline to cleanse 14,500+ air quality records and developed an interactive Power BI dashboard to uncover critical PM2.5 seasonal trends, driving actionable environmental policy recommendations.	
Topic-Level Sentiment Analysis to Reviews of the PLN Mobile on Google Play Store Python (BERT, NLP, TensorFlow) GitHub Report	2025
• Executed advanced topic-level sentiment analysis on user reviews using BERT-NN, achieving 96% classification accuracy, and BERT-EFCM for topic extraction, uncovering 8 feature-level topics to deliver actionable insights on user satisfaction.	
Multi-Platform API Data Scraping Python (API, Pandas, JSON Processing) GitHub Report	2024
• Built an end-to-end Python-based API data scraping pipeline, extracting data from multiple platforms, transforming complex JSON responses into structured datasets with Pandas, and performing rigorous data cleaning and preprocessing to ensure high-quality, analysis-ready data.	
EDA & Data Mining on Health Data Python (Logistic Regression, EDA) GitHub Report	2023
• Identified key health insights using Logistic Regression, revealing the most prevalent diseases, correlations among chronic conditions, and the effects of marital status and obesity on mental health outcomes.	
Online Bookstore Database System SQL, SQLite, ER Modeling GitHub Report	2023
• Designed and implemented a SQL-based online bookstore database supporting full CRUD operations and customer purchase analysis to enable personalized recommendations and data-driven business insights.	
Exploratory Data Analysis about Building Energy Usage Python (Pandas, NumPy, Matplotlib, Seaborn), EDA GitHub Report	2022
• Identified and synthesized key insights from ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) research to support and inform approaches for predicting building energy consumption.	
And many more...	

ORGANIZATION & VOLUNTEERING EXPERIENCE

Pojok Statistik <i>Agent of Statistics for Services and Consultations</i>	Feb – Sep 2024
• Delivered statistical consultations and translated BPS data into high-impact infographics and videographics to support data-driven decision-making across digital platforms.	
LOGIKA UI 2024 <i>Vice Head of Secretarial Division</i>	Jun 2023 – Feb 2024
• Co-led a five-member team and automated large-scale administrative documentation for 150+ schools and 100+ universities, significantly improving operational efficiency and accuracy.	
Pengenaln Departemen Matematika 2023 <i>Staff of Secretarial Division</i>	Aug – Oct 2023
• Drafted and distributed formal invitation letters to lecturers while managing weekly student registration support and attendance reporting to ensure accurate and professional onboarding documentation.	
TOSSAKA 19th <i>Head of Secretarial Division</i>	May 2022 – Jan 2023
• Led end-to-end secretarial operations, streamlining administrative documentation across divisions and directing the issuance of 100+ external letters and certificates to ensure timely, professional communication and formal recognition.	
Olimpiade Ilmiah Mahasiswa UI 2022 <i>Staff of Fundraising</i>	Sep – Dec 2022
• Compiled, verified, and monitored income data across multiple divisions using spreadsheets, ensuring accurate financial reporting and compliance tracking.	
Pengenaln Departemen Matematika 2022 <i>Staff of Creative Division</i>	Jul – Oct 2022
• Mentored 11 new students through structured academic and social guidance, while analyzing performance data using spreadsheets to monitor progress and support program evaluation.	
Himpunan Mahasiswa Departemen Matematika FMIPA UI <i>Administration and Secretarial Bureau Intern</i>	Nov 2021 – Feb 2022
• Automated internship certificate issuance using Autocrat with 100% accuracy, while implementing a structured filing system and drafting formal invitations to strengthen administrative efficiency and professionalism.	

ORGANIZATION & VOLUNTEERING EXPERIENCE

Pelatihan Berbasis Kompetensi (PBK) Data Analyst - Data Science Center Universitas Indonesia [Certificate]	Jul 2026
Data Scientist Supervisor (Nasional) - Digital Talent Scholarship [Certificate]	Jul 2026
Associate Data Scientist - Digital Talent Scholarship [Certificate]	Jul 2026
AWS Academy Graduate: Generative AI Foundations - Amazon Web Services (AWS) [Badge]	Jul 2026
